Hello EPA,

I support your work in general over the years, but you really must get more serious about cleaning up the Willamette river polluted sites! I am a Portland born resident. My family has been here since 1896.

I urge you to adopt option G and do not accept an option that includes a confined disposal facility. That sort of "cleanup" is stupid to even suggest.

Also, please do not use "monitored natural recovery" as it is not effective enough for our river!

I think the final result criteria for this project should be the lifting of the fish edibility advisory.

Please do not pass responsibility for the clean-up to the state of Oregon.

It is clearly EPA's duty to lead this project for years and years. That is what we want from the national EPA.

Please make the corporations that dumped the pollution pay as much as possible for this clean up .. it is outrageous that they dump and run.

Thanks for the opportunity to comment.

Regards,
